Melanie Hsiang

626-267-7200 | melaniehsiang@berkeley.edu | www.linkedin.com/in/melaniehsiang

EDUCATION

University of California, Berkeley **Aug 2022 - May 2026**
B.A. in Cognitive Science | Minor in Data Science
Relevant Courses: Artificial Intelligence; Data Structures; Statistics/Data Modeling; Data Ethics; Neuronal Communication

PROFESSIONAL EXPERIENCE

The Trade Desk - *Product Manager I* **Aug 2026 - Sept 2026**
- Synthesized 35+ tickets of trader feedback to implement new bid-setting recommendations leveraging historical clearing prices and win rates, projected to increase Kokai's Base/Max Bid tile traffic by 15%

The Trade Desk - *Product Management Intern* **May 2025 - Aug 2025**
- Drove a projected $6.2M lift in multi-retailer spend for FY2026 by building and launching a 0→1 retail reach tool to help traders measure audience reach and overlap across campaigns, convincing clients to activate additional retail data
- Improved workflow efficiency by a projected 10% in Q4, with 20% adoption in 2 weeks, by synthesizing 5 feature requirements from trader feedback to address audience duplication and previously unquantifiable incremental reach
- Published a competitor analysis matrix for 12 MMM vendors, resulting in the creation of TTD's Marketing Science Team

SAS Institute - *Product Manager (Contract)* **Aug 2024 - Jan 2025**
- Increased underwriter productivity by a projected 5% in Q1 by building an AI-powered dashboard to generate loan approval recommendations and actionable next steps, centralizing credit, capacity, capital and collateral
- Improved risk assessment precision by 10% by developing a KNN-based customer segmentation model leveraging geo, income, and credit similarity, validated via A/B testing

Amazon - *Program Management Intern* **May 2024 - Aug 2024**
- Improved FY2025 1DAY flight delivery accuracy by 10% using data preprocessing to quantify root cause analysis of late and/or missing packages, volume forecasting, and trade-off analysis between shipping accuracy and speed
- Cut delivery costs by $1.1M in Q4 by presenting to 15+ stakeholders (including VP of Amazon AIR) a product strategy to operationalize AST's Delivery Estimated Accuracy model by FY2025
- Delivered $100K+ in cost savings and reduced 15K+ missed packages by conducting an A/B test on 5+ network changes and labor allocation revisions to improve processing efficiency across AIR gateways

Meta - *Product Manager (Contract)* **Jan 2024 - May 2024**
- Reduced an estimated 5% of server downtime from natural disaster-related outages by building an MTTR and MTTD tracking leaderboard after identifying 3 gaps in disaster preparedness through 5 interviews with SREs at Facebook
- Increased SRE productivity by a projected 10% by designing a reliability-focused onboarding module for new hires and 10 internal reliability guidelines to be adopted as best practices

PG&E - *ML Product Manager (Contract)* **Aug 2023 - Dec 2023**
- Reduced an estimated 20% of man-made wildfires by designing an ML data preprocessing and collection pipeline to enhance the Remote Sensing Data Platform's health assessments of C-hooks in powerlines
- Synthesized feedback from 15 interviews with PhD candidates from MIT, CMU, Cal EECS to develop 2 feature recommendations grounded in industry trends and received preliminary feedback on proof-of-concept architecture

PROJECTS

Handwritten-Digit Neural Network | *Python, PyTorch* **Apr 2026**
- Developed a PyTorch neural network to classify handwritten digits from image data to predictions across 10 classes (0-9)

Email Spam Classification | *Python, scikit-learn, pandas* **Apr 2025**
- Built a logistic regression classifier on 8K+ emails, engineering text features and validating performance on held-out data

SKILLS & INTERESTS

Skills: Python, R, SQL, NumPy, pandas, PyTorch, scikit-learn, A/B Testing, UI/UX Research, Figma, Mandarin (Intermediate)
Interests: Backpacking, Mahjong, *Good Will Hunting*, Cello, Snowboarding, *People I (Mostly) Admire* podcast, Dumplings
